Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9, 11-17, 19-25 and 27-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Chen.

There is disclosed in Chen a cooking device, comprising: two main housing parts 41, 61; a dual sliding pin hinge 7 connecting the two housing parts; a heating element 43, 625 located in the two main housing parts respectively; removable heat distributing grills 42, 62 provided at each of the two main housing parts respectively; and a centrally located grease collecting tray 5; wherein the housing is so designed as to allow the user to cook with one housing part disposed level and the other housing part disposed at an angle, such that cooking fat drains away (see para. 6, and fig. 4).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10, 18 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen in view of Mullen.

Mullen discloses the use of removable grills in a cooking device, the grills having a smooth surface.

It would have been obvious to one skilled in the art to substitute the corrugated grills of Chen with the smooth grills taught in Mullen, in order to provide a different type of heat distribution to the food items being cooked.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Brady, Giguere et al., and Newell are cited for their disclosure of the state of the art.
